STRANDING MACHINE MT-BIT 800

MT-BIT 800

The haul off machine MT-BIT 800 has been designed to maximize the performance of a classical single twist, preserving product quality. The crucial point in the laying up of insulated cables with double or triple longitudinal taping, which is normally done with a single twist machine here is done with the MT-bit 800 which guarantees the same quality of single twist with twice of the production speed. Our machine is offered then as a bridge between the needs of lower production costs and increase the versatility of the machine, while maintaining a high standard of quality.
