COMPACTING DEVICE FOR STRANDS

For copper and tinned copper strands.

The assembly is composed of ceramic or tungsten carbide bushes, according to the compositions required by even or odd numbers of wires.

The compacting die is driven by a motor gearbox which is controlled on the operator panel of the machine.

For nickel strands and special alloys.

The assembly uses a lay plate with pulleys having ceramic grooves, in the compositions required by even or odd numbers of wires.

The compacting die is driven by a motor gearbox controlled from the operator panel of the machine.
