SPLICING UNIT FOR ARAMID YARNS

PRODUCT RANGE

Joining aramid yarns such as Kevlar or Glass fiber. The range of yarns classified in Dtex. is extensive and ranges from approximately 1600 Dtex. to 10,000 Dtex. Any other sizes should be sent to be tested.

FEATURES

The joining is done in one step. By setting the two products ends to be joined in a crossed position, the device attaches the two ends by re-arranging the fibres and obtaining a splice that has a tensile strength equal to about 80% of the tensile strength of the natural yarn.
