rif. 4.0290.1

BACK TWIST PAY OFF SV 4x290 BTW

On a vertical frame there are 4 overhanging shaft where there are the unwinding bobbins.

These shafts are all cinematically linked by a belt to the motor and that motor is digitally synchronizet to the stranding machine.

The flyers, pneumatically braked, will guarantee a constant tension from empty to full bobbin.

The tension regulation on product will be set in each unwinding position. An electrical cabinet will command all the control function, power and synchronisms of pay off to the machine.
