### COPS

Max 300x100 mm

Hole 3" 76 mm

The pay off SV4x500F is a creel for pads and cops of tap and normally it's used to feed packing machines. Individually or in pairs , it can be used as longitudinal taping device. The tension of the tape is obtained pneumatically with the control of a laser beam and a proportional valve. A processor will do the calculation for the continuous adjustment of the servo diameter. The laser will also control the pre-end pad.
