TWISTER "S-Z" F. O. TIGHT

Line for lay-up in S-Z of micro cables composed of optical fibres with tight insulation or traditional conductors. Possibility to laying up in simple or double crown up to a max of 24 elements in one step.

The stranding head can be put in tandem with armouring machine for aramid fibres (Kevlar/glass) and with concentric or tangential taping head.

Tandem is easier also with extrusion line.

The tension of cable is guaranteed by a double capstan following the right dimension.

An impregnation device will allow to tampon the cables during laying up.

The winding of product will be on different bobbins without affect the overall performances.
