ProPApp New PTFE Production Process for High Value Applications **CONDITIONED WAREHOUSE**

The air conditioned warehouse is suitable for the correct storage of the P.T.F.E. powders . It is composed by an insulated frame divided into two zones: one cold and one hot. The cold zone is controlled by a conditioner/dehumidifier with temperature between 18°/20°C, the hot zone is controlled by electrical resistance with temperature between 26°/28° C.

Each zone has a dedicated opening and three roller units inside for the storage of baskets and the moving by rolling.

The cold zone can contain up to a maximum of 21 baskets of 25 kg of powder and the hot zone up to 9 baskets of mixed powder.
